

Abstract

A compound represented by the formula:

[wherein R¹ is methoxy, methylthio, ethyl, etc.; R⁵ and
5 R⁶ are each independently cyclopropylmethyl, (4-
tetrahydropyranyl)methyl, etc.; and two of R⁴⁰, R⁴¹ and
R⁴² are C₁₋₆ alkoxy while the remaining one is
methoxymethyl, etc.], a salt thereof, or a hydrate of
the foregoing. This compound has excellent antagonism
10 against corticotropin-releasing factor receptor.
